

Anuj Tanwar

anuj@example.com | +91 9876543210 | Indore, India

Professional Summary

Computer Science student and engineer focused on high-throughput backend services, distributed systems, and clean RESTful API design.

Education

Bachelor of Technology (B.Tech) in Computer Science & Engineering | Shri Dadaji Institute of Technology and Science

2023 - 2027

Grade: 8.4 CGPA

Experience

Backend Engineering Intern | Apex Systems

June 2026 - August 2026

Junior Software Fellow | TechCraft Labs

January 2026 - May 2026

Projects

ResumeForge PDF Generator

Microservice engine that compiles structured JSON resumes into pixel-perfect PDF documents.

Technologies: Python, FastAPI, ReportLab, Docker

Distributed Task Queue

Fault-tolerant asynchronous job processor supporting worker concurrency, exponential backoff, and dead-letter queues.

Technologies: Go, Redis, Protobuf, PostgreSQL

Skills

languages: Python, C++, Java, TypeScript, SQL

frameworks: FastAPI, React, Node.js, Express, Tailwind CSS

databases: PostgreSQL, Redis, MongoDB, MySQL

tools: Git, Docker, Linux, Postman, GitHub Actions

Achievements

Selected among top 30 teams out of 2,400+ national submissions for building decentralized identity verification.

March 2026

ACM ICPC Regional Participant

Secured top 15 rank in regional collegiate programming contest solving algorithmic problems in C++.

2025
